

## Making your screen easier to see

**This factsheet tells you about how to make things on your screen bigger.**

# How to use this factsheet

We are **AbilityNet**.

We are a charity that helps disabled people use technology.

Like computers, tablets, and smartphones.

This is an **Easy Read** factsheet.

You may still need help to read it.

You can ask someone you know for help.

For more information you can phone or email us.

Phone **0800 048 7642**

Email [enquiries@abilitynet.org.uk](mailto:enquiries@abilitynet.org.uk).

# 1. What is screen magnification?

**Screen magnification** is when you make things bigger on the screen of a computer, tablet or smartphone.

**Magnification** means to make something bigger.

This makes things on the screen easier for you to see.

This is helpful for people who are visually impaired but can still see some things.

## 2. How technology can help

This factsheet tells you about the different ways you can magnify your screen.

Most computers, tablets and smartphones come with screen magnification tools.

Settings

You can find this by going to the Accessibility Settings.

Accessibility

My Computer  
My Way

Our **My Computer My Way** website tells you how to do.

We also tell you in this factsheet.

If you have any questions, you can [contact us at AbilityNet](#) and one of our volunteers will help you.

## Magnifiers on computers that use Windows

You can use the Windows magnifier by opening **Windows Accessibility**.

To open this, you can press the **Windows Key** and **U** on your keyboard at the same time.

Or you can switch on the magnifier by pressing the **Windows key** and tapping the **+** or **-** keys.

You can turn off the magnifier by pressing the **Windows key** and **Esc**.

## Apple magnifiers

The magnifier for Apple computers, iPads and iPhones is called **Zoom**.

It works well with lots of apps and with the Apple **internet browser** Safari.

An **internet browser** is how people get in the internet.

Settings

Accessibility

You can open Zoom by going to **Accessibility** in **Settings**.

## Android magnifiers

The magnifier for Android smartphones is called **Magnification**.

It works well with most apps.

It works well with the internet browser **Chrome browser**.

Settings

Accessibility

You can open Magnification by going to **Accessibility** in **Settings**.

## Chromebook magnifiers

**Chromebooks** are like laptops that work using a system called Chrome made by Google.

Chromebooks already have magnifiers on them.

Settings

Accessibility

You can find the magnifier by going to the Accessibility Settings.

### 3. About magnification software

You can also use **screen magnifier software** to make the screen bigger.

**Software** is what makes computers, tablets or smartphones do useful things.

This software makes everything on your computer screen bigger.

Screen magnifiers can cost a lot of money.

So it is best to try them out first before you buy them.

The most popular screen magnifiers for Windows computers are

- **Supernova magnifier from Dolphin**

- **Zoom Text magnifier**

## **SuperNova**

This screen magnifier is for people with some sight.

It lets you choose between magnifying the whole screen. Or magnifying just one section of it.

This makes it easier to find your way around the screen.

You use the keyboard to make things bigger or smaller.

Or you can use the **scroll button** on the mouse.

The **scroll button** is the wheel in the middle.

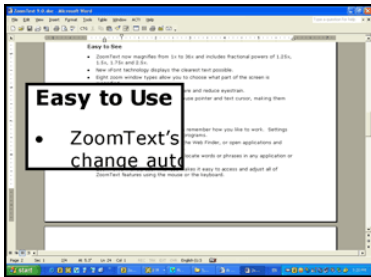

You can also change the colour so the writing is easier for you to read.

SuperNova can also read out what is on the screen.

But this costs more money.

# Zoom Text

Zoom Text does the same things as SuperNova.

Zoom Text also lets you connect a camera so you can make words on paper documents bigger.

## 4. Where you can get more help

You can get more information from these organisations.

**American Federation for the Blind**

Visit the website [www.afb.org](http://www.afb.org).

See differently

**Royal National Institute of Blind People**  
**Also called RNIB**

Visit the website [www.rnib.org.uk](http://www.rnib.org.uk).

# 5. How AbilityNet can help you

## My Computer My Way

The **My Computer My Way** website tells you how you can make your computer, tablet or smartphone accessible.

Website

[mcmw.abilitynet.org.uk](http://mcmw.abilitynet.org.uk).

## Advice and information

If you have any questions, you can contact us at **AbilityNet**.

We are here to help you.

**Phone** 0800 048 7642

**Email** [enquiries@abilitynet.org.uk](mailto:enquiries@abilitynet.org.uk).

## Support with technology at home

AbilityNet volunteers can help you with your computer, tablet or smartphone.

If you need support at home you can book an AbilityNet volunteer to visit you.

You do **not** have to pay AbilityNet for support at home.

For more information, visit [www.abilitynet.org.uk/at-home](http://www.abilitynet.org.uk/at-home).
